

EU AI Act Article 50: Public Applicability Quick Check — Evidence Worksheet

QCK-EUAI-ART50-001-WKS | ODA3 Institute | Companion Worksheet | Version 1.0 | Published | 5 August 2026

Purpose

This worksheet accompanies QCK-EUAI-ART50-001 (Version 1.0). Use it to record the answer, rationale and supporting evidence reference for each question, so a "Yes" or "No" is never recorded without a documented basis. Complete one worksheet per system or materially distinct use case.

This worksheet does not change, score or interpret the Quick Check. It is a recording tool only.

System identification

Field	Entry
System, product or workflow name	
Business owner	
Technical owner	
Jurisdictions and user populations served	
Organization's role(s) for this system (provider / deployer / both — may vary by obligation)	
Principal third-party models, platforms and content tools	
Date first placed on the market, if relevant	
Worksheet completed by	
Date completed	

Question record

#	Question	Answer (Yes / No / Unsure)	Rationale	Evidence Reference	Evidence Custodian	Last Verified
1	EU connection					
2	Provider, deployer or both					

#	Question	Answer (Yes / No / Unsure)	Rationale	Evidence Reference	Evidence Custodian	Last Verified
3	Direct interaction with people					
4	Synthetic content generation or manipulation					
5	Deepfakes					
6	Public-interest text					
7	Emotion recognition or biometric categorisation					
8	Pre-2 August 2026 transition claim					

Evidence Reference should point to a retrievable artifact — a contract clause, Data Processing Agreement section, product specification, UI screenshot, model card, vendor attestation, regulatory correspondence, editorial policy document, or equivalent — not a restated conclusion. An answer without a completable Evidence Reference should be recorded as **Unsure**, not Yes or No.

Result

Result (per QCK-EUAI-ART50-001 "Read your result")	Applies?
Potential Article 50 applicability identified	
Responsibility or transition analysis incomplete	
No trigger identified in this initial screen	

Overall Outcome	
Proceed to Legal Review	
Additional Evidence Required	
Applicability Closed	

Minimum next-step record (carried from QCK-EUAI-ART50-001)

Item	Entry
Completed answers and rationale	See table above
Provider/deployer determination	
Applicable trigger, exception and transition analysis	
Disclosure or marking-control owner	
Evidence repository/location and last verification date	
Known limitations and unresolved questions	
Required legal, technical or governance follow-up	

Re-screen trigger

Re-screen and complete a new worksheet whenever there is a material change involving: deployment geography, intended purpose, AI model or foundation model provider, user interaction pattern, content type, deployment architecture, ownership, legal role, applicable legislation or regulatory guidance, or a major software release.

Notably Absent

This worksheet does not contain scoring, a compliance threshold, or a finding-severity method. It does not itself establish that an exception applies or that evidence is sufficient for a regulator — those determinations require system-specific legal and technical analysis using the recorded evidence as a starting point.

Required limitation

Organization-led self-assessment recording tool, used alongside QCK-EUAI-ART50-001. It does not constitute independent assurance, certification, regulatory approval, legal advice or a determination of compliance.
